CORDANT™ ASSET PERFORMANCE MANAGEMENT OVERVIEW

Cordant™ APM (Asset Performance Management) Training equips users with practical skills to navigate and apply Cordant™ APM for asset risk management, maintenance optimization, and value tracking. Through four focused modules, participants learn to use dashboards and workflows that drive data-informed decisions, cost control, and enterprise-wide adoption.

Format

Duration: 1 hours **Delivery:** Elearning

Objectives

- Navigate and apply Cordant™ APM dashboards
- Quantify and manage asset-related risk
- Optimize maintenance spend with data-driven workflows
- Track and communicate value from executed actions
- Support enterprise-wide adoption and trust in Cordant™ APM

Program Outline

Program:

This course provides hands-on training in the use of Cordant™ APM to manage asset risk, optimize maintenance strategies, and demonstrate value through data-driven insights. Participants explore key dashboards and workflows that support smarter, more transparent decision-making across the enterprise.

Introduction to Cordant™ APM platform and navigation

Using the Total Risk Dashboard to assess and monitor risk

Identifying cost-saving opportunities through maintenance spend analysis

Tracking realized value with the Program Value widget

Applying insights to drive action and support enterprise adoption
